

# WINTER BLOCK™ LEAF NETS

**WARNING:** This is NOT a safety net to help prevent drowning.

**WARNING:** Do NOT walk or stand on the net or ice that may form on the cover.

**WARNING:** Ensure there is no access to the pool once the net/cover is installed.

**IMPORTANT:** Ensure there are no sharp edges present that may rip the net prior to installation.

**IMPORTANT:** Ensure proper winterization of the pool and its equipment is completed prior to installing the net.

## Above Ground Pools

1. Lay the Leaf Net over your winter cover allowing it to hang over and fit loosely on the cover.
2. Weave the cable through the eyelets of the net in an over/under pattern as shown.
3. Feed the two ends of the cable through the winch, one cable on each side (L and R) and then through the center hole (C) as shown, one through the top and one through the bottom of (C).
4. Pull each end of the cable to tighten against the sides of the pool and then rotate the winch handle in a clockwise direction to firmly hold the cable and cover in place.
5. Do NOT pull the net tightly.

**NOTE:** The locking clip will hold the winch in the tightened position. If cable needs to be loosened, turn the handle clockwise 1/4 turn and lift the locking clip to unravel the coiled cable.

## In Ground Pools

1. Lay the Leaf Net over your winter cover allowing it to hang over and fit loosely on the cover.
2. Tuck the net under the water tubes/bags used to hold down the pool cover.
3. For additional security or if water tubes/bags are not being used, feed a rope through the loops of the net and tie it down using spikes, bogs or other means of securing the net (not included).

**IMPORTANT:** Use of any anchoring device/object such as concrete blocks, pavers, bricks or other abrasive objects that will damage the net, will void the warranty.

# WARRANTY

SPQ warrants the cover to be from manufacturer defects. Inspect thoroughly before installation and install the leaf net with care. Tears, fraying, abrasions, dislodged eyelets or rips due to improper installation, environmental conditions, Acts of God or improper handling is not covered by this warranty. Use of any anchoring device/object such as concrete blocks, pavers, bricks or other abrasive objects that will damage the net, will void the warranty. This warranty is only valid within the Continental US and Canada.

This prorated warranty is provided only to the original owner from the date of purchase for a length of 4 years. This prorated warranty is nontransferable. The following schedule illustrates the percentage of the cover cost that the owner is responsible for based on the date of the claim and purchase date. The MSRP at the time of the claim is used to calculate the prorated amount. Freight charges will be added to the applicable cost of the net.

Year 1	.No Charge
Year 2	.70%
Year 3	.80%
Year 4	.90%

The above warranty is the only warranty provided to the end use, no other warranties provided by the seller of the product will be granted by SPQ Brands. SPQ is not responsible for any losses such as water, chemicals, labor, property or other during the use of this product.
