

## Bee Free Helmet Manual

Models: RPBHYS and RPBHYM

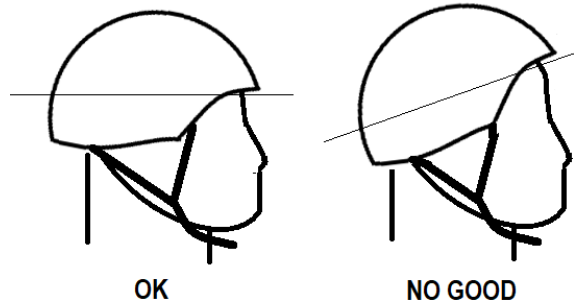

Complies with U.S. CPSC safety standards for bicycle helmets for persons age 5 and older.

### WARNINGS:

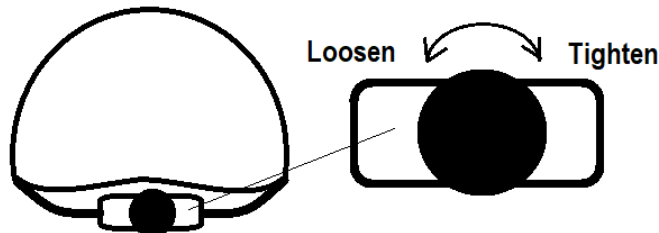

- No helmet can protect against all possible impacts and serious injury or death may occur.
- For maximum protection this helmet must be fitted and attached properly to the wearer's head in accordance with the manual.
- After an impact, the helmet may be damaged to a point where it is no longer adequate to protect the head against further impacts.
- Damage may not be visible to the user so a helmet that has sustain an impact should be replaced.
- The helmet may be damaged by common substances and solvents such as ammonia, bleach or other cleansers, it is recommended to only use mild soap and water if cleaning is necessary.
- This helmet is not suitable for climbing and should not be used as protection while operating a motor vehicle.
- This helmet is designed to provide limited, added protection to the head but cannot guard against all types of impacts that could cause injury to head, neck, spine or other body parts.
- Do not modify the helmet. Any modifications to the helmet may affect the helmets safety performance.

### Fitting Instructions:

- The helmet must be situated on the user's head properly as shown.

- The chin strap must be placed under the jaw and fit securely, not loosely. Adjust the buckle and strap as needed to obtain the proper fit.
- Rotate the rear knob to adjust the back straps so that it is tight against the wearer's head.
