

WATERWARDEN®

Assembly Instructions for In Ground Safety Net Reel

WARNINGS AND SAFETY INSTRUCTIONS

- Wear protective glasses, a mask and gloves when using PVC glue.
- Do not allow children to assembly or operate the net reel.
- Exercise caution when using a mallet or other tools.
- Work in a well ventilated area when using glue.
- See additional warnings on glue container, especially if glue is digested, irritates eyes or gets on skin.

HELPFUL HINTS

- Assemble the reel on a smooth, level, firm surface such as a garage floor or driveway.
- Place a drop cloth, cardboard or other material over surfaces to protect them from glue.
- Slightly dry fit all connections prior to gluing to ensure proper alignment of components.
- Optional: use a rubber mallet to ensure pipes and fittings are pushed together completely.
- Glue will dry very quickly, ensure proper alignment before gluing and have the rubber mallet readily available if chosen to use to secure fittings.

ASSEMBLY OF REEL

IMPORTANT: This manual is for the assembly of the net reel. Instructions on positioning of the reel are found in the main Safety Net Instruction Manual found inside the carton.

1. Arrange the components as shown in Fig 1.

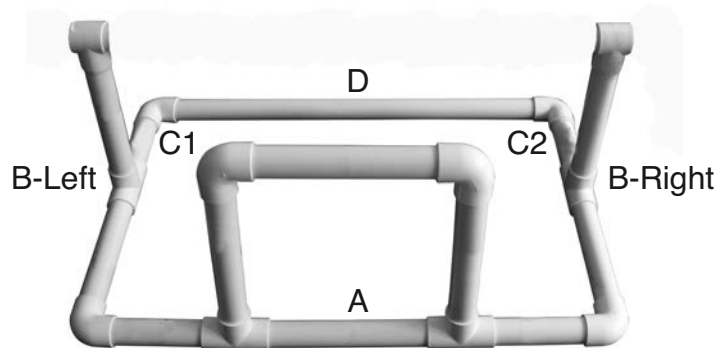

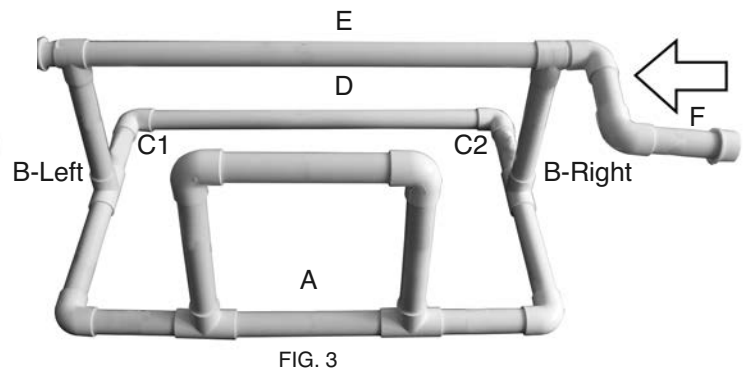

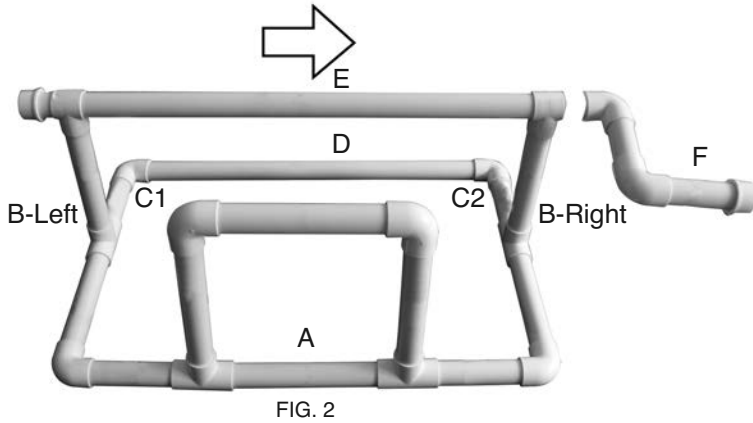

FIG. 1

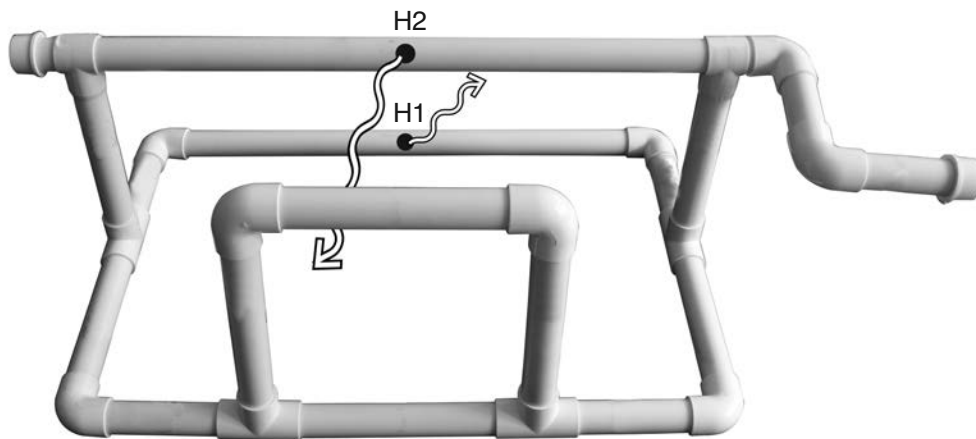

2. Glue A and B-Right - ensure both A and B-Right are vertical as in image Fig 1. Repeat for A and B-Left.
3. Glue C1 to B-Left and C2 to B-Right.
4. Glue D to both ends of C1 and C2.
5. Decide how you want to arrange the handle (left or right handed).
 A: Slide E through the top tees of both B-Right and B-Left.
 B: Glue F to E

IMPORTANT: Make sure to leave a minimum of 1/4" and a maximum of 1/2" on both ends of the tees on top of B-Right and B-Left for an easy rotation of the handle.

IMPORTANT: SEE THE SAFETY NET MANUAL FOR REEL POSITIONING PRIOR TO MOVING ON TO THE FOLLOWING STEPS. View Figure 4 below.

6. Tie a small rope and an anchor hook to the bottom cross support (H1). Install an anchor behind the reel with the small portion of the anchor facing the pool. Insert the hook into the anchor to support the reel while rolling and unrolling the net.
7. Pass the reel rope through the hole in the center of the rotating arm/cross bar (H2). Tie a knot to secure the rope so that it does not pull through the hole. The other end will hook onto the net.
8. Pass the rope through the front square shaped guide. The guide will funnel the net on the rotating arm/crossbar, neatly bunching it as it is reeled in.

See the net video on waterwarden.com to view how the net reel works.
